Safety Precautions

CAUTION
RISK OF ELECTRIC SHOCK

CAUTION:
To reduce the risk of electric shock, do not expose this apparatus to rain or moisture. Only operate this apparatus from the type of power source indicated on the label. The company shall not be liable for any damages arising out of any improper use, even if we have been advised of the possibility of such damages.

Graphic Symbol Explanation

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user of the presence of insulated dangerous voltage within the product's enclosure that may be sufficient magnitude to constitute risk of electrical shock to persons.

This exclamation point within an equilateral triangle is intended to alert the user of the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

All lead-free products offered by the company comply with the requirements of the European law on the Restriction of Hazardous Substances (RoHS) directive, which means our manufacture processes and products are strictly “lead-free” and without the hazardous substances cited in the directive.

The crossed-out wheeled bin mark symbolizes that within the European Union the product must be collected separately at the product end-of-life. This applies to your product and any peripherals marked with this symbol. Do not dispose of these products as unsorted municipal waste. Contact your local dealer for procedures for recycling this equipment.

Attention: installation should be performed by qualified service personnel only in accordance with the National Electrical Code or applicable local codes.

WARNING: TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE UNITS NOT SPECIFICALLY DESIGNED FOR OUTDOOR USE TO RAIN OR MOISTURE.
FCC STATEMENT

WARNING

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.
(2) This device must accept any interference received including interference that may cause undesired operation.

WARNING

This Equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

3. Physical Connection

SSD installation

① Please insert the key in the front of the device and turn counterclockwise 90° to unlock.

② Loosen the two screws and take off the cover.

③ Pull the rack out to install SSD.
④ Turn the rack over to install SSD. Please take note of the direction and tighten SSD up by the four screws.

⑤ Set the SSD back to DVR. Please be sure you it is locked.

After you installed the SSD, please put the rack back into the mobile DVR, tighten the two front screws and lock the rack. If the lock is not correctly done, the system won’t be started up and the power led will flash.

※ When SSD is installed, the bottom screen will display an Icon as
SD card installation

1. Shut the power down
2. Loosen screws and open the cover
3. Insert SD card in the slot properly

※ When SD card is installed, the bottom screen will display an Icon as 📄001%. Please refer to below photo.

- Icon and storage information will be shown here.

※ DVR only supports SD card formatted by FAT32. If use other format to record files, read/write problems may happen.
※ If the SD card is damaged, DVR will not be able to perform normal functions as recording, playback and so on.
   For the time being, please use computer to format the SD card. If it is still a problem, please contact the manufacturer of SD card for overhauling or data rescuing.
※ Supports SD, SDHC.
SIM card installation

When you purchase your SIM card to your telecom provider, please make sure that it meets one of the following standards in order to work:

GSM 850 900 1800 1900
WCDMA 850 1900 2100

① Loosen 4 bolts of the top cover and open it.

② Pull the SIM card socket.
③ Insert the SIM card with its gold contact facing down and as below shown.

④ Put the lid back and push it to lock.

※ POWER: DC 9.6-32 V

For your information ground and power + cable are protected with a 5A fuse. Note that, do not pull the power connector when the DVR is recording to avoid the SSD be damaged. First unplug all cameras, wait that yellow led turn off then unplug the power.

Event Box description
Setup

In order to access to the 4CH mobile DVR with a notebook, you need to have RJ45 cross cable.

Link the notebook to the DVR with the LAN cable.

Under windows 7

On the desktop bottom right, right click mouse on network icon then select **open network and sharing center**

Then on the left select **Change adapter settings**

Choose your lan wired connection then mouse right click and select properties.
Then click on Internet Protocol IPV4 and click properties

Assign an IP address to your notebook as the DVR default IP is **192.168.1.99**
Valid by pressing ok

**Internet Explorer setting**

Our device supports **Internet Explorer 7, 8, 9 (32bits) and 10,11 (32,64bits)**

The default IP address of the mobile DVR is **192.168.1.99**

In order to install the active X you need to change your Internet Explorer settings

Open Internet Explorer, Click the Tools button, and then click Internet Options. Click the Security tab, and then click a security zone Trusted sites. Click Sites.
The DVR IP should be shown in the *Add this website to the zone* field. Please make sure that the below option ‘require server verification’ is disabled Click Add and close.

Then turn the Security level to Low and press apply
Return to Internet Explorer main page

Press Install
The icon must be in blue color then please login in the DVR

Default administrator username/password is “admin”/ “1111”
Default guest username/password is “guest”/ “1111”
If you don’t operate the vehicle dvr after a period of time (30 minutes) you will be automatically logged out, then you need to login again with your account and password

You will have a pop up message
A pop up message will display, press Yes to continue
5. DVR operation via video out

Mouse right click → Advance

Advanced Setup
Record Setup:

- **Record setup**
  - **Channel**: 4 channels total. From 1~4.
  - **Start Record**: “ON”, “OFF”
  - **Frame Rate**: 1fps~30 fps (NTSC)/ 1fps~25 fps (PAL)
  - **Quality**: 5 options can be selected; “highest”, “high”, “normal”, “low”, “lowest”.
  - **Resolution**: “320X240”, “720X240”, “720X480”. (NTSC)
    - “320X288”, “720X288”, “720X576”. (PAL)
  - **Audio**: “ON”, “OFF”
  - **Post Record**: can be setup from “OFF”, “30 sec”, “1 min”, “2 min”, “5 min”, “15 min”, “30 min”, “1 Hour”. Finally, “Apply ALL”, “Save”, & “Exit”.
  - **Ignition Off**: postpone time can be set from ”30 sec”, “5 min”, “10 min”, “15 min”, “20 min”, “25 min”, “30 min”, “35 min”, “40 min”, “45 min”, “50 min”, “55 min”, “60 min”. After setup this section, click “Save” and this page will be automatically exited.

- **Streaming**:
  - **Frame Rate**: From 1~15.
  - **Quality**:"Highest”, “High”, “Normal”, “Low”, “Lowest”.

Device:

- **Camera Setup**
  - **Camera**: 1 ~ 4
  - **Camera Title**: edit the camera name.
  - **Color Setup**
    - **Brightness**: 0~10
    - **Contrast**: 0~10
    - **Saturation**: 0~10
    - **Hue**: 0~10
    - **Mirror**: "ON","OFF"
    - **Flip**: "ON","OFF"
      - “Click “X”, return to Device page..”

- **Storage**: Installed SSD & SD information will be located and listed here. Including SSD’s “Name”(The name of SSD will be Main storage), “Size”, “Format”.

  After click “Format” pop-out message would ask & make sure user want to do the “Format” action. Check “Yes” or ”No” button for your choice. Meanwhile, the SSD overwrite action can be set when SSD was fully used for the record file. Please note that if you insert a SSD that has been used prior, the SSD will be formatted.

- **Battery detector**:
  - **Enable**: “ON”, “OFF”
● **Voltage type:** 12v or 24v.
※ Battery voltage detection function: when the voltage is too low, will alert user.

● **Buzzer:**
  ● **Sensor:** “OFF (No suggest)”, “Critical”, “Warning”. Default is OFF
  ● **Video Loss:** “OFF (No suggest)”, “Critical”, “Warning”. Default is Critical
  ● **SSD:** “OFF (No suggest)”, “Critical”, “Warning”. Default is Critical
  ● **G-Sensor:** “OFF (No suggest)”, “Critical”, “Warning”. Default is Critical.

● **Event Setup:**
  Including the “Video Loss”, “Motion”, “Sensor”, “Speed Event”, “G-Sensor”.
  
  ● **Video Loss:**
    ● **Camera:** 1~4
    ● **Enable:** “ON”, “OFF”.
    If the status is “ON”, below 3 items can be setup at the same time.
    ● **Delay Time:** OFF, “1 sec”, “2 sec”, “3 sec”, “4 sec”, “5 sec”, “6 sec”, “7 sec”, “8 sec”, “9 sec”, “10 sec”.
    ● **E-mail:** setup the receiver’s E-mail.
    ● **Alarm out:** Click the icon if need.
  
  ● **Motion:**
    ● **Camera:** specific 1~4 camera can be set.
    ● **Enable:** “ON”, “OFF”.
    ● **Delay Time:** “OFF”, “1 sec”, “2 sec”, “3 sec”, “4 sec”, “5 sec”, “6 sec”, “7 sec”, “8 sec”, “9 sec”.
    ● **E-mail:** “ON”, “OFF”
    ● **Alarm Out:** click the box if need.
    ● **Event Record:** ”ON”, “OFF”
    ● **Event Popup:** “ON”, “OFF”
    ● **Sensitivity:** 1~5
  
  ● **Area Setup:** setup the area we want to monitor. In green color area, “motion function is turned on,

  ● **Sensor:**
    ● **Sensor:** 1 ~ 8
    ● **Enable:** ON/OFF
    ● **Delay Time:** 0 ~ 9 seconds
    ● **Priority:** 1 ~ 8
    ● **Email:** ON~ OFF
    ● **Alarm out:** click the box if need
    ● **Event record:** 1 ~ 4
● Event popup: 1 ~ 4

### Speed Event
*Enable: ON/OFF*

**Unit:** you can choose between Km/h or MPH

**Type:** High speed / Low speed

*Enable: ON/OFF*

**Threshold:** 1 ~ 300

**Delay Time:** define the length of the buzzer after each motion detection OFF ~ 9 seconds

**Email:** can send an email to predefined address in case of the event

**Alarm out:** in case of detection, DVR will send a signal via alarm out like a buzzer

**Event Record:** 1 ~ 4.

### G Sensor
*Enable: ON/OFF*

**Threshold:** OFF ~ 5g

**Vibration Boot:** ON / OFF

**Delay Time:** define the length of the buzzer after each motion detection OFF ~ 9 seconds

**Email:** can send an email to predefined address in case of the event

**Alarm out:** in case of detection, DVR will send a signal via alarm out like a buzzer

**Event Record:** 1~4

※ If GPS mouse has already connect to the device, the bottom screen will display this ICON
Network Setup

LAN

Host Setting: user can choose between STATIC IP, DHCP and OFF status

For static IP you need to key manually the IP, GATEWAY and NETMASK.

For DHCP, the DVR will retrieve the information from the network

Net Service

Center IP: VMS server IP address.

Center Port: default is 8788 but can be changed according to customer need

Register timing: “OFF”, “10 sec”, “30 sec”, “60 sec”.

Http Port: default is 80 but can be changed according to customer need

Streaming Port: default is 554 but can be changed according to customer need

Messenger Port: default is 1999 but can be changed according to customer need

DNS: if the user specifies a DNS, it will help the CMS to find the ip of the DVR more faster via using 3G connection

Telnet: “ON”, “OFF”.

※ Warning: make sure that these port are open in your router if you use a LAN network

※ If use LAN connect network, the bottom screen will display this ICON
E-Mail

SMTP Server: E-mail service mail server.

Port: E-mail service port.

SSL: ON/OFF

Sender: sender mail

Recipient: recipient mail

Enable SMTP Auth: ON/OFF
(some mail server need user authentication.)

Account: mail service account.

Password: mail service password.

E-mail test: Due to the authorization problem, some mail server will not work properly. Please click the “E-mail test" button to test your mail server. If you don't receive the email, please contact with your MIS department or change another mail server and try again.
3G Network/4G Network

Enable: ON/OFF

Access Point Name (APN): default is Internet.

Access Number: default is *99#

Username

Password

※ If use 3G (or 4G) to connect network, the bottom screen will display this ICON

WIFI

Enable: ON/OFF

SSID: input your WIFI AP name.

Authentication: input your WIFI AP connect key.

※ If use WIFI to connect network, the bottom screen will display this ICON

Remote connection supports up 2 people log in
Example:

(network) x1 : Represent there 1 person is using LAN connection now.

(network) x1 : Represent there 1 person is using 3G(or 4G) connection now.

(network) x1 : Represent there 1 person is using WIFI connection now.

</tr>
</tbody>
</table>

**Apply**

**Enable:** ON/OFF

**Threshold:** OFF ~ 5g

**Dwell time:** define the length of the buzzer after each motion detection 0 ~ 9 seconds

**Email:** can send an email to predefined address in case of the event

**Alarm out:** in case of G-Sensor detects a variation, DVR will send a signal via alarm out like a buzzer or flashing red light

---

**Speed event**

**Speed Event**

<table>
<thead>
<tr>
<th><strong>Configuration</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Enable</strong></td>
</tr>
<tr>
<td><strong>Unit</strong></td>
</tr>
</tbody>
</table>

**Apply**

This page let user to enable or disable the speed event detection

Unit can be kilometer per hour KPH or mile per hour mph

User can enable or disable high speed detection, specify the highest speed threshold, its dwell time from 0 to 9 seconds, whether to send an email or not and whether to enable alarm out.
High Speed

**Speed Event**

<table>
<thead>
<tr>
<th>Configuration</th>
<th>High Speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable</td>
<td>OFF</td>
</tr>
<tr>
<td>Threshold(kPH)</td>
<td>100</td>

<td>255.255.0.0</td>
</tr>
<tr>
<td>Default Gateway</td>
<td>192.168.6.254</td>
</tr>
</tbody>
</table>

This side enables user to setup network in order to remotely connect to it for example with a notebook for maintenance.

If the network has a DHCP server, you can enable this function.

Please make sure that gateway and subnet mask are the same on both side.
Register timing

Streaming

If your network has a router, please make sure to open these ports in order to enable smooth access to the DVR via browser or VMS software. All these port can be customized according to your needs.

Server software installation

Server main purpose is to receive data from each mobile DVR, so user needs to tell to DVR the server IP, open internet explorer and key in the DVR IP, then go to Network then Port.

Notice:
Due to the authorization problem, some mail server will not work properly. Please click the "Mail Test" button to test your mail server. If you don't receive the email, please contact your MIS department or change another mail server and try again.

Mail Test

SMTP server: we recommend to use gmail
Port: check with port your SMTP server is using
SSL: enable or disable according to your SMTP server
Sender: key in the email of the sender
Recipient: key in the email of the person who will receive notification in case of event.
SMTP authentication: enable or disable according to your smtp server if it's enable user need to provide the mail account and password
Mobile network setting

Mobile network

Enable 3G

ON  OFF

Configuration

Access Point Name (APN)

internet

Access Number

1999

Here you can enable or disable 3G. Provide information of how to connect to the 3G network (please check your operator for dial up procedure)

WIFI setting

WIFI

Enable WIFI

ON  OFF

Here you can enable or disable the wifi
7. Configuration

Information

This section shows three type of information:
- Network such IP, http port, streaming port, MAC address and gateway
- Wireless network such as connection type, IP and gateway
- SSD such brand size and occupation ration

System

Network: displays current network setting and Mac address
SSD: displays SSD brand, model number, size and occupation percentage

Display

User can select which items to display
Two level of user can be define and unlimited account can be created
Guest can only see live picture
Administrator as full authority on the device
Cell phone and Email are just for reference and optional

Date and time

Select your prefered date format and hour format here

Daylight Saving

Enable or disable daylight saving, according to the time zone, it will automatically turns it on and off at the right time

Vehicle information
Modify Serial number, Company name, Driver name and License number

**Format**

**Format**

<table>
<thead>
<tr>
<th>Model Name</th>
<th>Capacity</th>
<th>Health</th>
<th>Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>TOSHIBA MK3276</td>
<td>320.0 GB</td>
<td>Usable</td>
<td>6</td>
</tr>
</tbody>
</table>

User must format the SSD before start recording

**Factory reset**

Once press this option a warning message will appear asking you if you want to reset, press YES to apply

![Factory reset]

**system reboot , please wait...**

![System reboot]

**Reset Default finish!**

![Reset Default]

Press ok
For troubleshooting purpose, you can browse the log. Select the starting and ending time, the channel concerned and use our 4 filters to reduce the number of events then press SEARCH. If you don’t select channel, it will display system event.

<table>
<thead>
<tr>
<th>Type</th>
<th>Information</th>
<th>Start Time</th>
<th>End Time</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operate</td>
<td>Login</td>
<td>2012-05-26 14:20:05</td>
<td>2012-05-26 14:20:05</td>
<td>192.168.10.64</td>
</tr>
<tr>
<td>Operate</td>
<td>Login</td>
<td>2012-05-25 17:03:52</td>
<td>2012-05-25 17:03:52</td>

</tr>
<tr>
<td>Operate</td>
<td>Host/Car Setup</td>
<td>2012-05-25 17:03:22</td>
<td>2012-05-25 17:01:22</td>
<td>192.168.10.64</td>
</tr>
</tbody>
</table>

If you want to backup the log, press BACKUP,
Then press download
it will export all the events in one csv file
Choose **Save**

Then open the file with Microsoft Excel or any program supporting csv file
8. Register Server installation instructions

This guide is aim to install database and server application for mobile DVR.

Architecture

Mobile DVR server and system architecture is based on three server Register Server, Log Server and Database server.
8.1 Basic requirements

Although the server can be built on the same computer, to have the best performance, we recommend that each individual can have a separate server software hardware environment. Database server and application server farm proposal meet the following basic requirements to achieve the best performance.

System hardware basic requirements

<table>
<thead>
<tr>
<th>Item</th>
<th>Minimum requirements</th>
<th>notice</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU</td>
<td>32/64bit · above four core · each one at least 1.5GHz</td>
<td></td>
</tr>
<tr>
<td>Memory</td>
<td>Above 4GB</td>
<td></td>
</tr>
<tr>
<td>SSD storage</td>
<td>At least 500GB</td>
<td></td>
</tr>
<tr>
<td>Network</td>
<td>Ethernet 100/1000M</td>
<td>Need static IP from telecom provider or setup in the firewall Port Forwarding</td>
</tr>
</tbody>
</table>

Minimum requirements of the software

8.2 Database Server setting

(notice : if MS SQLServer is already installed please bypass this step

8.3 Before install SQL Server 2008 Express please make sure you installed below software

<table>
<thead>
<tr>
<th>Server type</th>
<th>item</th>
<th>Minimum requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Database Server</td>
<td>Operating System</td>
<td>Windows XP above 32/64 bits .Net Framework 2.0 and above</td>
</tr>
<tr>
<td></td>
<td>Database system</td>
<td>SQL Server 2008 Express R2 or above</td>
</tr>
<tr>
<td>Register Server</td>
<td>Operating System</td>
<td>Windows XP above 32/64 bits .Net Framework 2.0 and above</td>
</tr>
<tr>
<td>Log Server</td>
<td>Operating System</td>
<td>Windows XP above 32/64 bits .Net Framework 2.0 and above</td>
</tr>
</tbody>
</table>

Step 1 : download and install Microsoft .Net Framework 3.5 SP1

Step 2 : download and install Windows Installer 4.5

Step 3 : download and install Windows PowerShell 1.0
8.4 Go to Microsoft website and download SQL Server 2008 R2 SP2 Express or click the following link

Microsoft® SQL Server® 2008 R2 SP2 - Express Edition

Click on download and select the file SQLEXPRWT_x86_ENU.exe then click on NEXT
8.5 Database server installation with SQL Server 2008 Express

8.5.1.1 Launch the application called SQLEXPRWT_x86_ENU

8.5.1.2 Accept the licence term and click on next
8.5.1.3  Select all then click on Next

8.5.1.4  Setup database server name and path route
8.5.1.5  Set the database server account and specify the account name

NT_AUTHORITY\SYSTEM
8.5.1.6 Choose Mixed mode and key a password for database server purpose

8.5.1.7 Click on next the installation is finished
8.6 Setting database server in order let the client connect to it
In windows bar, click on start → all program → Microsoft SQL Server 2008 R2 →
Configuration tools → SQL Server configuration manager in TCP/IP option → mouse right click TCP/IP choose **Enable**

![SQL Server Configuration Manager](image)

Then right-click on "Properties" to enter the "TCP / IP Properties" settings, switch to the "IP Addresses" tab in the Properties list, go to the last one "TCP port" setting is 1433. Then restart the SQL Server, click the "SQL Server Services" and then select "SQL Server" to restart its services to ensure the changes take effect
Install Server database
This software is located on the software cd folder called Environment

Launch ServerDBInstall.exe, this installer must enter Database administrator (sa) password and automatically creates the necessary databases and tables, and generate the database dedicated management accounts ddadmin, the default password is 1111, for the first time after installation, please Be sure to modify the password. The installer only for database installation, delete function does not provide a database, the database administrator shall be manually deleted, if the repeated execution of the program, the original database data will be cleared, please exercise caution.

Launch Server database installation program

Enter the required information
If the system is not installed MS SQL Server can not continue with the installation, they already exist, the database server can be used, it is in the "SQL Server Instance" field appears optional server name. Please enter a database and the highest privilege management account and password. If you need to change the actual data storage paths can modify "Database File Path" held only recommended default options.
confirm whether you want to continue the installation

- Installation is finished
9. Vehicle Management Software (VMS)

Our VMS is composed:
A client called Voyager VMS
A pc viewer called Voyager PLAYER,
A server software please follow below instructions

Install Register server software located in the cd Setup folder on the server pc and follow instructions

![RegisterServer_2.2.1.0](image)

Then install the Voyager VMS software on the client pc and follow instructions

![VoyagerVMS_1.0.0.0](image)
**Operation**

**Server side:** launch the application named register-server

Default account and password are admin / 1111

Then you will access to a page showing device connection status.

At this page you can see each device registered ID(RID), Vehicle ID, Version of the firmware, Update time, network information and Status.

Clear button enables clear the current list, the server will then updates automatically the mobile DVR that can be linked.
Click on the second tab will let you access to server list

Click on the third tab will let you access to the account management
There are 3 levels of account, Administrator, Operator and Guest each can be customized on the right side. This concerns login from cms client,

Click on the fourth tab will let you access to the server setting

Server setting: default port is 8788, you need to double check on the mobile dvr that the port is the same otherwise the server wont be able to see the device

Start / Stop the service: the default setting is set on enabled but you can manually stop the server
Client side: launch the application called Voyager VMS

Fill in Login ID and password

Specify the server IP, Specify the server streaming port
Tool bar description

**Full Screen**

Displays the video in full screen on your monitor, to return to normal mode press ESC button on your keyboard

**Video download Manager**

Download recorded data from the dvr remotely, you can choose the vehicle ID, the channel, the date and time and the backup length and do multiple backup. We recommend to be in LAN or WIFI environment to download the data and avoid be in 3G mode to download as the risk of failure is very high.
Remote setting

let you remotely setup mobile dvr features
all the functions are the same of the mobile dvr itself, to be able to access to the setting, the dvr must be connected.

VMS option

Lets you setup the snapshot path folder, live record path folder, event log number, GPS displayed unit, and used map
Vehicle list

Display or hide the vehicle list

4 type of display are available select the one according to your preference

Vehicle list: the program will show connected device with additional information, you can create or delete group for better management and pull one device to a group
Before you can see live video, you need to create a group. Click on , a vehicle icon will appear, right click on the mouse to display the functions

Add vehicle: choose the vehicle you want to add by selecting them

Then confirm by pressing OK
Here you can see Live picture and GPS information

※ The GPS function is only for satellite positioning.

This figure shows G-Sensor information

This section shows real time information such as event, vloss, relay out or motion detection
Voyager player application operation:

Default id/password is admin/1111

Program interface
<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>①</td>
<td>Position of the vehicle according to OpenStreetMap</td>
</tr>

</tr>
</tbody>
</table>

There are two ways to open the files:

**Open AVI**

To open a file press the first icon and find the folder you store the avi file

You will be able see the recorded files displayed by date
To play a file just double click on the date then a specific time
Open SSD

After you select the SSD you will see this display

You can export the video into avi file by pressing the third icon
## Control bar description

<table>

</tr>
</tbody>
</table>
Snapshot

If you press the snapshot icon, a window will pop out

You can save manually or auto save the picture
You can adjust print setting by pressing SETUP button, another window will come out

You can add in your picture print license number, plate number, date and time, and also description (by adding text)
If you press PRINT button, the computer will send the picture to your connected printer.
Setting

Here user can select GPS display unit and Map. If you select “disable load map failed message, Voyager player do not show this warning.

In this section, you can manage your different account, by changing administrator password or add new account. You can also delete user.
In this part, you can change channel sequence by clicking UP and Down.
