Pick a Spot for Your Radio

1. Install the Dash or Vent Mount

Attach the Dash Mount to the selected: the knob and adjust it 2-4 hours before using the mount. The dock mounting plate can be tilted in different directions. Position, press, and hold the Dash Mount plate to position the antenna the correct orientation.

Adjust as necessary for your particular vehicle. When the temperature is at least 60°F, turn on the heater in your vehicle to bring the temperature up to 60°F. The dock mounting plate can be tilted in different directions.

2. Connect the Audio to Your Vehicle’s Stereo

Connect Vehicle Dock. (Options 1 & Option 3 should be oriented as shown.) Use the FM Direct Adapter (FMDA) for better audio quality.

An available FM channel is one that’s not being used by an FM radio station in your area. When you tune your FM radio to an available channel, you should only hear static or silence – not talk or music.

We recommend one of the following methods to find an available FM channel:

- Briefly turn on your vehicle’s FM radio (if you have not already done so) and tune it to this FM channel. When you hear static or silence, you have found an available FM channel.
- Manually tune through your local FM channels on your vehicle’s FM radio. Locate and create a list of available channels. The FM channel you selected will be confirmed on the display screen.
- Go to the website and enter your zip code. The Channel Finder will suggest a list of available FM channels in your area.

If the signal reception is not highlighted, press the selects same button OR OR

The FM channel you selected will be confirmed on the display screen.

3. Connect the Power Adapter

Connect Power Adapter into your vehicle’s cigarette lighter or power adapter connector on the FM radio. Cassette Adapters are sold separately. Plug the Cassette Adapter into your vehicle’s auxiliary input jack, or consult the vehicle owner’s manual for the best:

- FM Direct Adapter
- Aux In Cable
- FM Channels

4. Finish the Installation and Power On

You will listen to the Stratus 6 through your vehicle’s stereo system or FM radio. First, the Stratus 6 must be receiving the SIRIUS signal so that you can tune to a channel and hear SIRIUS clearly. Each time, you will need to tune your vehicle’s FM radio to an available channel. The FM channel you selected will be confirmed on the display screen.

Make sure your Stratus 6 is properly installed, turned on, and receiving the SIRIUS signal so that you can listen to SIRIUS clearly. Each time, you will need to tune your vehicle’s FM radio to an available channel. The FM channel you selected will be confirmed on the display screen.

5. Activate

This option is to activate your Stratus 6. OR OR
